

**Amendments to the Abstract of the Disclosure:**

Please replace the originally-filed Abstract of the Disclosure with the following Abstract:

The present invention relates to ~~the~~ an luminescent ski having ~~the~~ a permanent magnet rotated by the movement of ski and an induction coil located ~~in the~~ around of the permanent magnet, wherein, the rotation of the permanent magnet ~~generate~~ generates the induction current on the induction coil, and, this induction current is the electric source of the luminescent ski.
